

SOLVING CERVICAL ISSUES HAS NEVER BEEN EASIER

High-quality screening & High-precision treatment

Screen & Treat in a single sitting!

Elimination of cervical cancer by 2030

In 2019, WHO issued new guidelines for the use of thermal ablation for cervical pre-cancerous lesions, recommending the thermal ablation as an alternative method of treatment.

The New **EVA Pro**

Digital Colposcope
Powered by AI (optional)

SCREEN

ThermoGlide

Treating precancerous lesions
with thermocoagulation

TREAT

EVA PRO -

The Gynac Stethoscope

A turn-key cervical and vulvar visualization solution to streamline how you perform, document and review patient cases.

Digital touch screen

Enhances the visualization experience, allowing to zoom in on images and perform the examination in a convenient manner.

Sophisticated software with annotation capabilities

Save images with notes, annotate biopsies and points of interest, add clinical impressions, edit in device or on portal.

Built in camera with magnifying capabilities

Superior image quality, you can identify a lesion as small as 0.05 mm

Hands free image capture
For optimal use

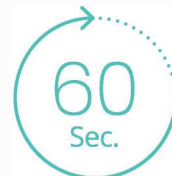

Powered by AI (optional)

supporting the WHO strategic objective to eliminate cervical cancer by 2030

can be used by trained doctors & paramedics

Results received within 60 seconds, directly at point of care
